

## /19,7 KM/ D+: 115m/ 4h 05 min /Circular PR-Z 150 · Chapel of San Marcos Route

Circular, pedestrian, and cycling tour through the agricultural landscapes of the huerta of Chiprana. Immersed in an agricultural landscape irrigated with the waters of the historic acequia of Civán, it visits the wetlands of La Estanca y La Salada, the latter declared a Managed Nature Reserve, and the popular sites of the Baños de Fonté and the chapel of San Marcos. Very interesting and attractive route for nature lovers and fans of active tourism.

TRACK

MAP

The start of Route PR-Z 150 is located at the roundabout at the entrance to the town and departs along the GR-99 following the road to the halt. After about 500 m, it leaves the road and turns left onto a farm road that runs between crop fields bordered by small stands of Aleppo pines.

A larger track crosses the bridge over the railroad tracks, linking shortly after with the service road of the main acequia of Civán. Following this path, always parallel to the course of the acequia, you reach the spectacular natural viewpoint of the Laguna de La Estanca.

At the intersection with an asphalt road, the route leaves the acequia service road and takes this new road to the right.

A new dirt road leads, on the left, to the old Balneario de Fonté and shortly after to some abandoned houses.

After passing by a livestock corral and a drinking trough, the trail continues towards the Chapel and Recreational Area of San Marcos, from where we can turn off to the Saladas de Chiprana. The PR-Z 150 runs first along an asphalted road, then crosses the tracks and heads towards the halt.

Without going through the tunnel under the railway, leave the previous track and follow the path to the right in the direction of a nearby tower. After passing under the railway, take the track that skirts the Laguna de La Estanca, until it connects with the road to the halt, where you return to the starting point.
